PaceMate CEM

CARDIAC EVENT MONITORING

Common Clinic Challenges

Clinicians and doctors log in to multiple vendor sites to triage and interpret cardiac event monitors. Inefficient processes result in **delayed patient care, missing documentation, and lost revenue capture.**

- × Siloed cardiac data + multiple login sites for clinicians
- × Integration maintenance with limited IT resources
- × Lost revenue via non-capture of CPT codes
- × Printing + scanning from multiple vendor sites

PaceMate integrates with the top 4 event monitoring companies.

THE PACEMATLIVE DIFFERENCE

Review, dictate, approve, and e-sign event monitors anytime, from any device, anywhere.

- ✓ One dashboard for managing cardiac event monitors remotely
- ✓ Integration with all EHRs—automatic clinical documentation + billing charges
- ✓ Increased revenue capture via automated CPT creation
- ✓ Analytics on patch volume + clinician efficiency
- ✓ Documentation compliance—reduced liability with end-to-end patch processing
- ✓ Ability to analyze continuum of care for cardiac patients

Welcome to #streamlined.

Recognized as a Top 100 Healthcare Technology Company by Healthcare Technology Report, PaceMate offers the most comprehensive remote cardiac monitoring solution in the industry. PaceMateLIVE is the only clinical dashboard with user-friendly integrations for all implantable cardiac devices, ambulatory monitors, consumer ECGs, and heart failure products. PaceMate's Auto-Triage™ prioritizes patients based on clinician-customized standards—not device alerts—resulting in substantial reduction in alert burden. With the most live connections through EHR-partnered integrations across Epic, Cerner, and athenahealth, PaceMate offers a true, vetted, and validated industry-leading solution for interoperability: ensuring bi-directional data transfer for more accurate reporting, streamlined workflows, and one-click billing. PaceMate's software-only, concierge on-demand, and full-service offerings deliver a flexible, customized solution to your cardiac practice. Visit PaceMate.com to learn how one platform is transforming the future of digital health.
