

Cardiac Remote Monitoring Platform

# The Only Comprehensive Cardiac Remote Monitoring Solution. Period.

Streamlining your cardiac data.

## All the Data. One Platform.

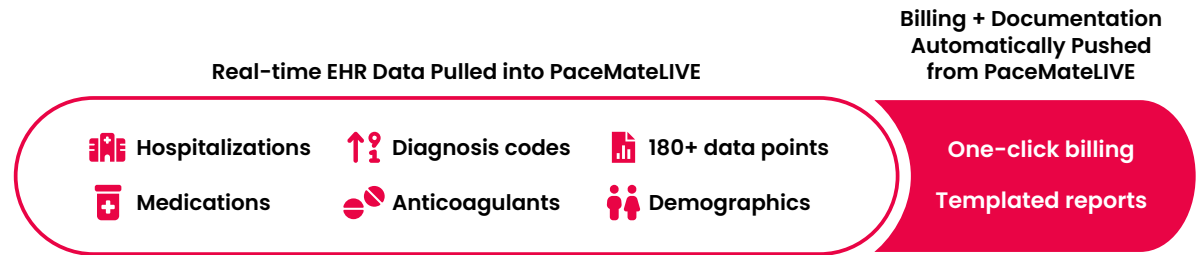

Simple. Smart. Scalable.

Transform data management across your patients' entire cardiac care continuum with PaceMateLIVE™—the only platform that delivers streamlined workflow solutions for reporting, billing, and more via a single user-friendly dashboard.

Implantables	Ambulatory cardiac monitors	Heart failure	Consumer ECGs

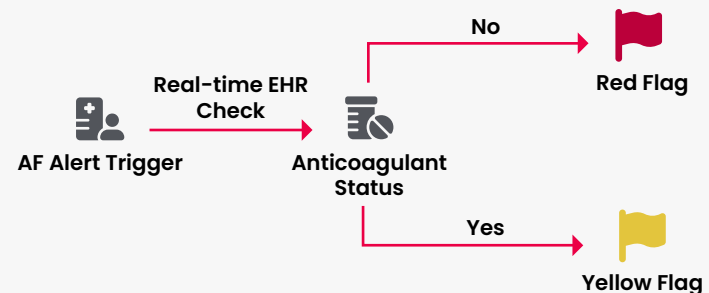

## Harnessing Real-time EHR Data Stay Connected. Stay Informed.

Only PaceMateLIVE provides you up-to-date patient insights with integrated EHR data, saving time and clicks by streamlining data entry, scripting order and encounter submissions, and more. Integrate with all EHRs and experience seamless connectivity with real-time, bidirectional integrations with Epic, Cerner, and athenahealth.

## Introducing Auto-Triage™ Intelligent Patient Prioritization

Discover the power of Auto-Triage, exclusive to PaceMateLIVE. Our platform automatically prioritizes your most vulnerable patients first through customizable algorithms empowered with real-time EHR data integrations and device alerts.

- Remote monitoring by cardiac rhythm management experts
- Immediate triage of critical alerts directly to on-call HCP
- "Stat read" requests from clinicians
- Dedicated patient communications team
- Customized clinic staffing support to extend your practice

## About PaceMate

Recognized as a Top 100 Healthcare Technology Company by Healthcare Technology Report, PaceMate offers the most comprehensive remote cardiac monitoring solution in the industry. PaceMateLIVE is the only clinical dashboard with user friendly integrations for all implantable cardiac devices, ambulatory monitors, consumer ECGs, and heart failure products. PaceMate's Auto-Triage™ prioritizes patients based on clinician-customized standards—not device alerts—resulting in substantial reduction in alert burden. With the most live connections through EHR-partnered integrations across Epic, Cerner, and athenahealth, PaceMate offers a true, vetted, and validated industry-leading solution for interoperability: ensuring bi-directional data transfer for more accurate reporting, streamlined workflows, and one-click billing. PaceMate's software-only, concierge on-demand, and full-service offerings deliver a flexible, customized solution to your cardiac practice. Visit PaceMate.com to learn how one platform is transforming the future of digital health.
