

PaceMate®

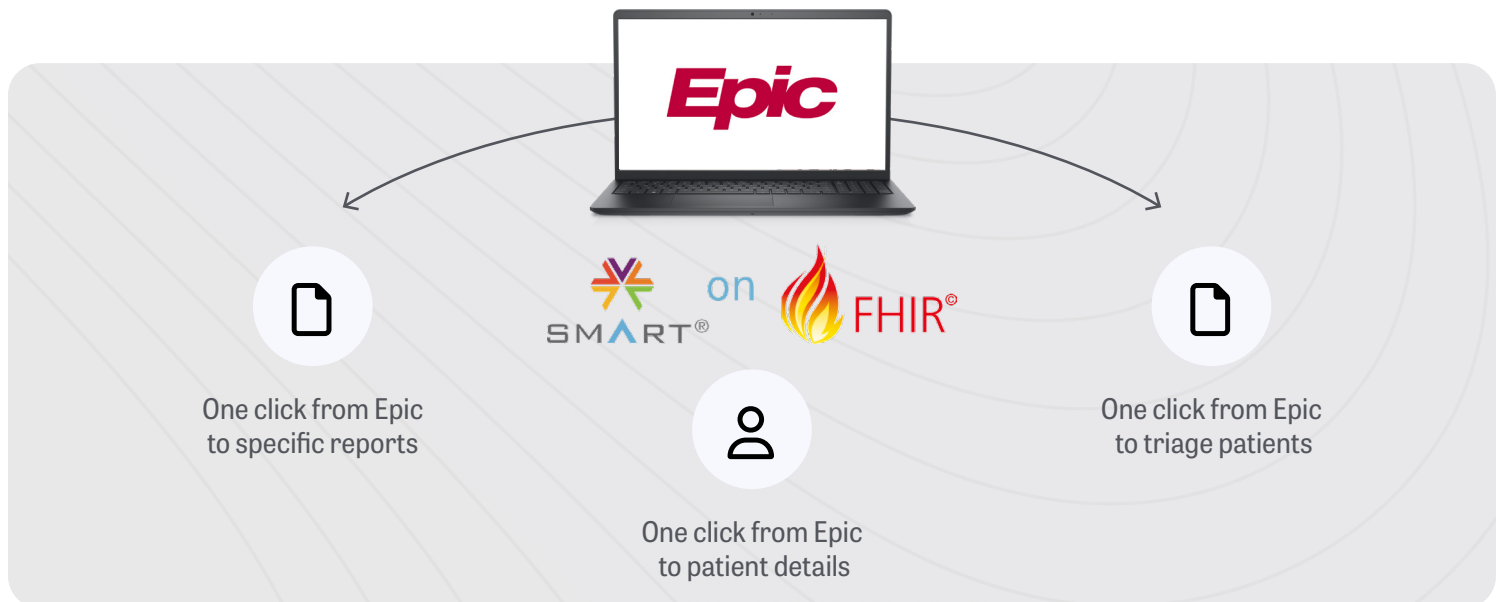

Cardiac Remote
Monitoring Platform

PaceMate now offers our Epic customers SMART® on FHIR® capability.

Three unique launch points to access PaceMate in different contexts

Current Clinic Challenges with EHR Data

- × No direct access to patient chart or report in ancillary systems
- × Too many logins and passwords to remember
- × Need for two-way systems and two screens

Welcome to #streamlined.

Recognized as a Top 100 Healthcare Technology Company by Healthcare Technology Report, PaceMate offers the most comprehensive remote cardiac monitoring solution in the industry. PaceMateLIVE is the only clinical dashboard with user-friendly integrations for all implantable cardiac devices, ambulatory monitors, consumer ECGs, and heart failure products. PaceMate's Auto-Triage™ prioritizes patients based on clinician-customized standards—not device alerts—resulting in substantial reduction in alert burden. With the most live connections through EHR-partnered integrations across Epic, Cerner, and athenahealth, PaceMate offers a true, vetted, and validated industry-leading solution for interoperability: ensuring bi-directional data transfer for more accurate reporting, streamlined workflows, and one-click billing. PaceMate's software-only, concierge on-demand, and full-service offerings deliver a flexible, customized solution to your cardiac practice. Visit [PaceMate.com](https://www.pacemate.com) to learn how one platform is transforming the future of digital health.
