

PaceMateLIVE™—Your comprehensive cardiac remote monitoring platform.

Easy to implement. Easy to use. Easy to prioritize.

Together, we never miss a beat.®

Simplify the complex. Transform your workflows. Generate new revenue. Focus on the actionable first with confidence. All from one intelligent dashboard—the only fully interoperable cardiac remote monitoring platform available. PaceMateLIVE—smarter and simpler for all.

“On day one with PaceMate, we realized dramatic increases in efficiency. No back-and-forth between remote monitoring sites and Epic—all the data was in one place.”

—Andrea M. Russo, MD, FACC, FHR, FAHA | Cooper University Hospital

Implantable Cardiac Devices

Heart Failure Devices

Ambulatory Monitors

The only fully interoperable cardiac remote monitoring platform available.

Consumer ECGs

We never miss a beat.®

Easy to Implement

One & done.

All the data. One fully interoperable platform. Invest in our one-and-done solution, benefit from our partnerships and integrations, and onboard to the future today with PaceMateLIVE. With virtually no data entry at onboarding, all your patients are live from day one. And with our exclusive real-time EHR integration, all of your patients' cardiac data is always current—no stale info ever. Flip the switch and you're on. Future-proof. Future-ready. Today.

Easy to Use

Easy as PaceMateLIVE.

PaceMateLIVE offers a single sign-on platform that puts all the data you need at your fingertips in real time for better patient outcomes. We're the only cardiac data platform that supports the full cardiac care continuum—implanted cardiac devices, ambulatory monitors, heart failure devices, and consumer ECG devices. Let's un-complicate your workflows together. Review it. Click it. Bill it. Get on with it.

Easy to Prioritize

First things first.

Accelerate cardiac care to those who need it the most with PaceMateLIVE's unique ability to prioritize the urgent. Exclusive to PaceMate, real-time EHR data is combined with device data, so you see the most critical alerts immediately. Our Auto-Triage™ feature flags actionable patients with precision, unlocking faster, targeted care. Compassionate patient care starts here.
